PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience building full-stack web applications using React, Next.js, Node.js, Express, and PostgreSQL. Passionate about designing reliable backend systems, developing production-ready software, and contributing to open-source projects including Zulip and Rocket.Chat. Strong problem-solving skills with a 1980+ LeetCode Contest Rating and 500+ solved DSA problems, demonstrating a solid foundation in algorithms, data structures, and collaborative software development.

EDUCATION

Bachelor of Technology in Data Science

Newton School of Technology, Rishihood University

Aug 2024 – May 2028

CGPA: 8.0/10.0 (Top 10% of cohort)

SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0

Databases & ORM: PostgreSQL, MongoDB, Prisma

AI/ML: NumPy, Pandas, Matplotlib, Gemini API

Tools: Git, GitHub, Docker, Postman

Core CS: Object-Oriented Programming, System Design, Computer Networks, Software Testing, Debugging

PROJECTS

MoneyMind - Smart Personal Finance Tracker [\[GitHub\]](#) [\[Demo\]](#)

- Designed and developed a full-stack personal finance platform using React, Node.js, Express.js, Prisma, and PostgreSQL, implementing JWT authentication, REST APIs, dashboards tracking 100+ transactions.
- Integrated the Gemini API to analyze 1000+ transactions, generate personalized financial insights, recommend budgeting strategies, and deliver an AI-powered assistant for smarter financial planning.
- Optimized backend architecture with reusable APIs, efficient database queries, and responsive data visualizations, improving maintainability, scalability, and overall user experience.

DailyDrive - Your Daily Growth Companion [\[GitHub\]](#) [\[Demo\]](#)

- Engineered a full-stack employee development platform using React, Node.js, Express.js, and MySQL, serving 100+ users with secure JWT authentication and 20+ RESTful APIs.
- Implemented analytics dashboards, personalized goal tracking, and progress monitoring to provide real-time insights into learning, fitness, and productivity activities.
- Designed scalable backend modules and database schemas to support community features, reporting, and long-term extensibility while maintaining clean, modular application architecture.

CERTIFICATIONS

Full stack generative and Agentic AI with python Certificate - Udemy [\[Certificate\]](#)

Hands-on expertise in full-stack Generative and Agentic AI with Python, including LLMs and RAG pipelines.

ACHIEVEMENTS & EXTRACURRICULAR

Open-Source Contributor (Zulip & Rocket.Chat) - Contributed bug fixes, feature enhancements, and collaborated through pull requests and code reviews.
